Company Differentiators

- **Data Management.** In house, data management platform, programming team, and support that provide real-time, transparent integration of information with clients and subcontractors. Data vertically integrated with client and subcontractors.
- **Past Projects.** Patriot has worked on all but one of the Shelter-at-Home projects in the U.S. since inception, making Patriot a leading go-to provider.
- **Program Management.** Solutions-based management for both client and subcontractor. Turnkey provider.
- **Relationships.** Our past performance offers a level of trust that affords us the opportunity to have repeat clients and subcontractors.

Company Profile

Patriot Response Group is a full-service emergency management firm offering more than **60 years** of combined leadership experience in disaster response, recovery, and construction services. Operating in the U.S. and its territories, we focus on regions with limited resources and communities devastated by hurricanes, tornadoes, and severe flooding.

Our multidisciplinary staff collaborate to provide services including initial disaster relief, temporary and permanent emergency repairs, mitigation and remediation, temporary housing solutions, disaster readiness planning, and data management. We believe we make a difference to our clients with our agile approaches to problem solving and empower individuals through the process.

Core Competencies - Construction

Patriot provides nationwide resources and a full range of emergency response and disaster recovery construction services to serve clients and communities in crisis. Patriot takes great pride in our project performance and client satisfaction. Our customers can rely on our qualified and experienced experts to deliver solutions and meet expectations at all levels of project delivery.

NATIONWIDE RESOURCES. Highly qualified professional staff and construction crews located throughout the Southeast United States and Caribbean. Crews are capable of **mobilizing within 24 hours**, with state-of-the-art equipment to perform all construction related trades from light remodeling to new ground up structures.

PRE-CONSTRUCTION. Risk evaluation, damage assessment, building code impacts, environmental survey, design and engineering, planning, estimating, and project scoping.

PROJECT & PROGRAM MANAGEMENT. Schedule and budget management, subcontractor coordination, stakeholder coordination and communication (FEMA, insurance companies, other agencies), crisis management, support for insurance claims and public aid applications, public relations, data management, asset management, quality control (QC), safety, and project closeout.

CONSTRUCTION SERVICES. Rehabilitation and restoration, environmental remediation, spill response and cleanup, air monitoring and sampling, demolition and removal of unsafe structures and debris, new construction, blue roofs, temporary and permanent housing, and relocation assistance.

Past Performance

Patriot has completed nearly **\$30 million** in complex emergency and disaster management services . We have supported more than **100 clients** in recovery operations after disaster strikes.

Patriot’s recent emergency management and disaster response experience are provided in the table below. As demonstrated by the projects, Patriot has progressively assumed more responsibilities, demonstrating our **clients’ trust in our ability to perform construction, QC, and supply chain management**. Our QC Team has often relieved clients of their QC roles.

Patriot’s **Response Asset Management platform (RAM)**, allows **reliable and secure cloud-based documentation** to support on-site and remote QC functions, recordkeeping, accurate billing, project tracking, scheduling, daily reporting, and ease of communication between our subcontractors and local and remote offices. This platform ensures an efficiently executed project with a high rate of inspection passes.

Our work has enabled residents impacted by disasters to return to or remain in their homes while permanent repairs were completed, thereby reducing the number of individuals in congregate shelters and FEMA’s Transitional Sheltering Assistance (TSA) program.

Project Differentiators

- **Rapid Response.** Highly experienced and diverse construction crews are available for rapid response and deployment to remote locations. Work includes site development, interior and exterior repairs, roof rebuilding, as well as plumbing, mechanical and electrical tradesmen; CONUS/ OCONUS.
- **Safety First.** Zero Accidents vision with fully trained staff. The health and safety of our workers and the communities are never compromised.
- **Quality Control.** QC team that enables us to have the highest inspection pass rate when compared to our competitors.

Agency/Client	Value	Project Description
